

CORE

CORE

REVOLUTIONARY

TURF

TECHNOLOGY

RESILIENCE AND

PERFORMANCE

INNOVATIVE TO THE CORE

Years of continuous development and innovation have resulted in FieldTurf's ground-breaking new fiber concept. Introducing... CORE.

Using the very latest raw material components, and proprietary extrusion technology combining polymers of different characteristics, CORE brings synthetic turf performance to a whole new level. With a hardened center to deliver outstanding resilience and durability, and a soft outer layer to ensure optimum player-friendliness and player-surface interaction, CORE is the most exciting yarn innovation in the synthetic turf industry.

KEY FEATURES

- Exclusive bi-component structure
- Engineered high density core for exceptional resilience
- Soft outer layer and durable external body for outstanding player-friendliness
- Distinctive ridged diamond profile for enhanced durability
- Proprietary polymer technology
- Market-leading durability and softness
- World class precision-extrusion technology

LISPORT EVALUATION

During the test of simulated use featuring **200.000** cycles at the Lisport wear tester according to EN 15306 the artificial turf surface FieldTurf 42-17 showed no visible damage to the fibres.

UNIQUE DESIGN

The combination of our distinctive ridged diamond profile and high density core, built with our proprietary polymer technology has resulted in a turf engineered exclusively for outstanding player-friendliness and enhanced durability.

OUTER YARN

Soft and durable external body for outstanding player-friendliness

CORE

Engineered high density core for exceptional resilience and durability

CERTIFICATIONS

PLAY TO WIN

FieldTurf is the synthetic turf division of Tarkett Sports, part of the Tarkett Group which has been producing hi-tech, safe sustainable, and inspiring flooring solutions for over 130 years.

Our aim was to create the very best playing surface possible as an alternative to natural grass, combining the performance properties of natural grass with the benefits of a synthetic solution.

FieldTurf chose to engineer a synthetic sports field system which would give great performance, exceptional durability and offer superior athlete safety and installed its first full-sized infill football field back in 1994. FieldTurf invented and perfected long-pile, infilled synthetic turf, and today there are more than 10,000 FieldTurf pitches around the world.

We are proud that our synthetic turf systems have hosted many World firsts, including FIFA World Cups and UEFA Champions League matches.

FieldTurf has provided solutions to many top football clubs, including Ajax, FC Barcelona, Borussia Dortmund, Mainz, Augsburg, 1860 Munich, Olympic Lyonnais and Arsenal. In addition we have provided top class rugby solutions to Cardiff Arms Park, Oyonnax and Toulouse.

We are the company that changed the industry and the global leader for outdoor sports solutions. We would be delighted to welcome you to the FieldTurf Family and hope you will enjoy our product range.
